

ECOPERLA MAESTRO

YOUR PROBLEM

Are you looking for a filter that not only purifies water but also heats it to a selected temperature? Do you need a mobile device that will work well in a rented apartment, in the office, or even when you're away? Are you interested in practical solutions designed in the spirit of zero waste? Don't want to overpay for bottled water?

OUR SOLUTION

Crystal clear water without waste? Ecoperla Maestro can do it. This countertop reverse osmosis is a true master of filtration, and thanks to its compact housing, it will fit on any kitchen counter, without the need for permanent installation. The multi-purpose filter cartridge will remove microbiological contamination from tap water and reduce its hardness, and the filter rejection can be used to water plants.

GENERAL INFORMATION

Ecoperla Maestro is a countertop reverse osmosis with a water heating function, which is distinguished by its exceptionally low water rejection. The system is also economical in terms of operation - it contains an efficient 3-in-1 cartridge, which is replaced only once a year (or after). Since all you need to start the filter is access to an electrical outlet, Ecoperla Maestro is the most mobile reverse osmosis system in the manufacturer's portfolio.

Wymiary filtra (w/s/g)	35,1 x 21,5 x 34,7 cm
Membrana	75 GPD
Temperatura (min/max)	5/38 °C
Zbiornik	4 l
Moc	2100 W
Napięcie	220 V/50Hz

FILTRATION STAGES

1. Mechanical filtration foam - removes small mechanical impurities, reduces turbidity
2. Activated carbon - improves organoleptic parameters of water (taste, smell, color)
3. Reverse osmosis membrane - a durable component with an efficiency of 75 GPD removes bacteria, viruses, mineral salts, pesticides, fluorine, nitrates, microplastics and many other contaminants from water with precision down to single ions

WHAT'S INSIDE?

- Multi-purpose 3-in-1 filter cartridge (mechanical filtration foam, activated carbon and 75 GPD osmotic membrane)
- Water quality control system using a TDS meter
- Light alerts when the cartridge needs to be replaced
- Water heater with the possibility of heating to 45, 85 and 100°C
- Parental lock

DESIGN

- Durable and compact housing with power connection
- Large tank for raw water (4 l) and smaller for filtered water (0.8 l)
- Interface with illuminated buttons for pouring water, programming its temperature and volume
- Magnetic tray to protect your countertop from spills
- No need to connect the filter to the water system

MOBILE SOURCE OF CLEAN WATER
