

ECOPERLA

ECOPERLA PROFINE POU 2 ULTRAFILTRATION SYSTEMS

DESCRIPTION

Ecoperla Profine POU 2 perfectly complements a central water treatment system. It is a small, two-stage kitchen filter for under-sink installation, which can be used to adjust water parameters and organoleptic properties to the user's expectations. The combination of activated carbon (0.5 micron precision) with ultrafiltration membrane (0.1 micron precision) brings very good results. The device is easy to install and the capacity of filtering cartridges is up to 10,000 litres of water.

CHARACTERISTICS

- Compact and aesthetic housing
- Improved organoleptic properties
- Does not remove minerals from water
- No water reject into the sewage system
- Great efficiency of filtering cartridges
- Does not take up much space
- Simple assembly
- Elegant, modern spout included

TECHNICAL SPECIFICATIONS

Filter dimensions (H/W/D)	32 x 20,5 x 10,3 cm
Efficiency	3 l/min
Pressure (min/max)	2/6 bar
Temperature (min/max)	4/30 °C
